The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simon et al in view of Calderas et al (US Patent No. 6294214) for the reasons set forth in rejecting the claims in the last office action. The amendment to claim 1 and the new claims are not seen to influence the conclusion of unpatentability previously set forth.

Simon et al disclose the combination of acesulfame K and high fructose corn syrup (HFCS), see entire document, especially Figure 11.

The claims differ as to the specific HFCS and the amounts.

Calderas et al disclose the conventional use of HFCS-42, HFCE-55, and HFCS-90 in combination with artificial or noncaloric sweeteners such as acesulfame (see entire patent, especially column 8, lines 42-65).

It is further noted that the claimed amounts, in the absence of a showing to the contrary, are deemed a matter of choice and at most optimization. It is conventional in the art to manipulate sweetener blends to obtain desired results.

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the specifically claimed HFCS in that of Simon et al because the use and manipulation of HFCS in the sweetener art is conventional.

Art Unit: 1761

Applicant's arguments filed February 22, 2006 have been fully considered but they are not persuasive.

Applicant argues that the claimed invention provides the sweetness and taste profile of HFCS 55, that the cited prior art generically cites the claimed components, and that hindsight reasoning was used.

Simon et al disclose the combination of acesulfame K and high fructose corn syrup (HFCS), see entire document, especially Figure 11.

Calderas et al are cited to teach the conventional use of HFCS- 42, HFCE-55, and HFCS-90 in combination with artificial or noncaloric sweeteners such as acesulfame in a beverage (see entire patent, especially column 8, lines 42-65).

The prior art clearly teaches the claimed components as conventional in the art. It is conventional in the art to manipulate sweetener blends to obtain desired results having a specific taste profile. In the absence of a showing of unexpected results, the claimed components are used for no more than their art-recognized function to obtain no more than expected results.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a

reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.
